WORK EXPERIENCE

JAVA FULL STACK TRAINER | NIRMAAN.ORG **2024-PRSENT**

- Deliver Java Full Stack training to students through classroom and hands-on learning.
- Train students in Core Java, HTML, CSS, JavaScript, SQL, and Spring Boot.
- Guide students in developing real-time projects and provide technical support throughout the project lifecycle.
- Conduct coding exercises, assessments, mock interviews, and interview preparation sessions.
- Mentor students on technical skills, communication skills, and professional development.
- Support students with resume preparation and job-portal profile creation.
- Coordinate with companies and placement teams to identify suitable job opportunities for students.
- Organize and support job drives, recruitment activities, and student registration.
- Track student placements and maintain placement-related records and reports.
- Conduct soft-skills and career-readiness sessions to improve students' employability.

PROJECTS

1. **College Admission Management System**

Technologies: Java, HTML, CSS, JavaScript, SQL

- Developed a web-based college admission system to simplify the student registration process.
- Designed and implemented an online registration form to collect and manage student admission details.
- Implemented an automated email notification feature that sends a confirmation email from the college management to students immediately after successful registration.
- Managed student registration data using a database for easy access and record maintenance.
- Implemented form validation to ensure accurate student information during registration.

2. **Voice-Based ATM Machine**

- Technologies: Java, NLP, SQL
- Developed a voice-enabled ATM application for basic banking operations.
- Implemented features such as balance enquiry, withdrawal, deposit, and transaction handling.

3. **Student Placement Management System**

- Technologies: Java, Spring Boot, HTML, CSS, JavaScript, SQL
- Developed a system to manage student profiles, job opportunities, applications, and placement records.
- Designed features for tracking student registration and placement status.
